Sothink SWF Quicker

Did you ever need to edit a Flash file and don't want to spend hundreds of dollars on flash software??

I have many times received a swf file along with the fla file and had no way to edit the fla file and didn't want to spend almost a thousand dollars on software ..so my search began for a swf editor. I came across this software and now I can't imagine living without it. It does so much more than just give you the capabilities to edit swf files but has been a lifesaver for me and you can't beat the price.
